## ACMG Daily Gear Cleaning and Disinfecting log for all Equipment and PPE For use with all guiding activities where equipment is provided

Please refer to the following excerpt from the **Suggested COVID-19-related Best Practices for Phased Return to Work for ACMG Members** for cleaning and disinfection methods

- **Soft goods - Single day use (ropes, harnesses, slings, draws etc.)** - Before each trip ensure all company/guide owned have either been isolated for a minimum of three days or have been washed in warm, soapy water
- **Soft good - Multi day use - (Packs, tents, sleeping pads and footwear)** Before each trip ensure all company/guide owned have either been isolated for a minimum of three days or have been wiped down with warm, soapy water. Before each trip, ensure all company/guide owned sleeping bags and liners have been cleaned according to manufacturer’s instructions
- **Hard goods. (biners, ice axes, crampons, pro, avalanche safety gear, skis, ski poles, hiking poles etc.)** Before each trip ensure all company/guide owned hard goods have either been isolated for a minimum of three days or have been washed in warm, soapy water. For hard goods with no soft material or plastic, spraying with a dilute solution of bleach and water followed by adequately drying is an acceptable alternative.

Method Abbreviations – Isolated (I) , warm soapy water (WSW), disinfecting spray (DS)
